SUMMARY

I build responsive web experiences and practical software solutions, working across modern frontend technologies, backend services, APIs, and databases. My work spans legal-tech tools for district courts, a live scholarship-exam platform for a school, education portals and e-commerce storefronts. My foundation is in Java and Spring Boot, my frontend work is in React and Vite, and I am now building on C#, ASP.NET Core and SQL Server in my current role as a .NET Developer.

EXPERIENCE

.NET Developer — Oct 2026 — Present

- Working inside established ASP.NET Core application codebases — setting up local environments, database connectivity and API workflows.
- Debugging and tracing REST endpoints with Swagger and Postman, and learning the architecture of production services.
- Writing and reviewing C# code with Entity Framework Core against SQL Server, using Git-based team workflows.

Full-Stack Web Developer

- Delivered the Shri Shahu Prabodhini scholarship-exam platform and its admin panel, live on a custom domain.
- Built Court AI — a legal-language translation workspace and a court administration dashboard for Pune district courts.
- Shipped education portals with student, coordinator and admin roles, registrations, results and online mock tests.

React / Frontend Developer

- Built responsive multi-page sites for a coaching academy, a bookstore and a cosmetics store.
- Focused on reusable components, routing, form handling and mobile-first layouts.

Java Developer — Foundations

- Built a strong base in object-oriented programming, Java and Spring Boot REST services with relational databases.

SELECTED PROJECTS

Court AI — Translator — A legal-language workspace that extracts text from scanned images, PDFs and Word files and translates it across 10 Indian languages. [React, Vite, Tesseract.js, pdf.js, Translation API]
punecourttranslator.netlify.app/#/ · github.com/Prapti1103/PuneCourtTranslator

Court AI — Admin — Court administration dashboard for cases, teams, tasks and virtual hearings with screen sharing. [React, Vite, Lucide, Media Devices API]
punecourt.netlify.app/ · github.com/Prapti1103/PuneCourtAdmin

Shri Shahu Prabodhini School — Production website for a school in Maharashtra and home of the Sankalp Online Scholarship Exam — with bilingual content, admissions, toppers, gallery and a separate secured admin panel. [React, Vite, REST API, Admin auth, Leaderboard, Custom domain]
shrishahuprabodhini.in/

Sankalp Foundation Exam Portal — Exam portal with student registration, roll-number results, online mock tests and separate Student, Coordinator and Admin dashboards. [React, Vite, Role-based UI, Netlify]
sankalpweb.netlify.app/ · github.com/Prapti1103/sankalpwelfareClient

MPSC रणभूमी Academy — Multi-page academy site with course detail pages, test series, demo lectures, downloadable notes, feedback and a contact form. [React, React Router, Vite, React Icons]
mpscranbhoomi.netlify.app/ · github.com/Prapti1103/mpsc_ranbhoomi

PM Books — Book Cart — Bookstore storefront with category browsing, featured and new-arrival carousels, deal of the day, reviews, blog and sign-in UI. [HTML5, CSS3, JavaScript, Swiper]
pmbooks.netlify.app/

Soil Serumz — Store for hair, skin and body care with shop-by-concern navigation, cart with free-shipping progress, best sellers and deal of the week. [HTML5, CSS3, JavaScript, Bootstrap, jQuery, Swiper]
soil-serum-web.netlify.app/

SKILLS

Frontend	React.js · JavaScript (ES6+) · Vite · HTML5 · CSS3 · React Router · Responsive Design · Framer Motion
.NET & C#	C# · .NET · ASP.NET Core · ASP.NET Core Web API · Entity Framework Core · LINQ
Java	Java · Spring Boot · OOP · REST Services
Data & APIs	SQL Server · SQL · REST API design · API integration · JSON · IndexedDB / localStorage
Tools	Git & GitHub · Visual Studio · VS Code · Swagger · Postman · Netlify · Vercel
